

When our school embarked on an Administration Block upgrade Vince Abela and his staff provided our small school with a range of great plans that met our needs and our brief. It was fantastic to be given such a range of possibilities that all were within the small school budget brief.

We were extremely pleased with the entire process. Once our plan was selected the Architects effectively and efficiently worked to make the changes as discussed and to review the plans. Abela Architects took our schools unique situation into account and reflected our individual needs through all of the design drawings.

At all stages of the design process Vince and his staff kept us informed and worked well with our schools appointed project manager.

I enjoyed working with Vince and his team they provided a professional service that met our needs throughout.
